## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election with traverse of Group I, claims 1-3 and 12-22 on 5/10/2004 is acknowledged. The traversal is on the ground(s) that a single search would provide all prior art relevant to each group due to the overlapping nature of the subject matter claimed. This is not found persuasive because Group I and II are related as product and process of use. A search of the product claimed may overlap the method of using the product. However, a search of the product claimed does not include all the areas required for a search directed to the method. Accordingly, additional search is required for Group II and a serious burden does exist. In addition, the product and method claims are classified in two different classes and may required to be examined by different groups of examiners with different expertise. Therefore, in order to ensure the prosecution quality, the product claims and method claims should be searched and examined separately.

Claims 4-11 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement on 5/10/2004.

The requirement is still deemed proper and is therefore made FINAL.

***Priority***

2. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in European Patent Office on 8/13/2002. It is noted, however, that applicant has not filed a certified copy of the EPO 02102130.8 application as required by 35 U.S.C. 119(b).

***Specification***

3. The disclosure is objected to because of the following:

The Brief Description of the Drawing(s) is missing, *See* MPEP § 608.01(f) and 37 CFR 1.74. Appropriate correction is required.

4. The incorporation of essential material in the specification by reference to a foreign application or patent, or to a publication is improper. Applicant is required to amend the disclosure to include the material incorporated by reference. The amendment must be accompanied by an affidavit or declaration executed by the applicant, or a practitioner representing the applicant, stating that the amendatory material consists of the same material incorporated by reference in the referencing application. *See In re Hawkins*, 486 F.2d 569, 179 USPQ 157 (CCPA 1973); *In re Hawkins*, 486 F.2d 579, 179 USPQ 163 (CCPA 1973); and *In re Hawkins*, 486 F.2d 577, 179 USPQ 167 (CCPA 1973).

***Double Patenting***

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. *See In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed.

Art Unit: 1775

Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 3, 14, 18-20 and 22 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 5, 10, 15 and 20 of copending application No. 10/629,242. Although the conflicting claims are not identical, they are not patentably distinct from each other because the cited claims in both applications recite the same nano-porous metal oxide semiconductor comprising phosphoric acid or phosphate and triazole or diazole compound.

Claim 1-2, 12-13, 15-17 and 21 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 5-8 and 19-23 and 24 of copending Application No. 10/630,492. Although the conflicting claims are not identical, they are not patentably distinct from each other because the cited claims in both applications recite the same nano-porous metal oxide semiconductor comprising phosphoric acid or phosphate.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
